

Linklite Mk III 240V

Temporary Trackside Lighting

The Linklite portable lighting system is ideal for all road, track or tunnel projects where lightweight temporary floodlighting is needed to illuminate long distances easily and efficiently.

Made in the UK

- 
A daisy chain of light
 As the name suggests, Linklites are simply connected together to form a continuous chain of lights.
- 
Over a quarter of a kilometre from 3KW of power
 Up to 280m of road or rail track can be fluorescently floodlit from a single power source and the lighting chain will continue to operate should any individual lamps fail.
- 
Shock resistant, water resistant, dust proof
 Linklites feature an extremely durable polycarbonate lens casing making them ideal for rigorous outdoor use.
- 
Stackable for easy storage
 The lamp head, mast and steel base can be disassembled and stacked for easy transportation and optimal storage.

Rated Voltage	240V	Lamp CCT	6500K
Rated Wattage	72W (2 x 36W)	Lamp head length	545.9 mm
Ingress Protection	IP44	Lamp head width	272.61 mm
Max. Connected Lights	14	Lamp head height	135.4 mm
Complies with	EN 60598-2-4:1997 / EN 60598-1:2008 + A11:2009
